

### *1.1 Introduction – Day 8 – Academic Listen – Speak*

### 1.2 Instruction - Academic Listen-Speak

The slide features a background image of a person's hands typing on a laptop keyboard while holding a mug. A blue header bar at the top contains a speaker icon, the text 'Class 6', and 'Speaking - Session 4'. A green close button is in the top right. A white speech bubble with a megaphone icon and the word 'INSTRUCTION' is on the left. The main text area is divided by horizontal lines. A red 'Continue' button is at the bottom.

**Class 6**  
**Speaking - Session 4**

**INSTRUCTION**

**Academic Listen-Speak**  
Listen to a short talk on a school subject. After the talk, you will be asked to speak about what you heard. You should listen carefully, Answer the question clearly and completely, talk about the important parts of the talk, and give some details about them. Follow the steps.

**Step 1.** Play the Audio.  
**Step 2.** Adjust the speed and volume of the audio as per the class requirement.  
**Step 3.** Discuss the question as per the audio.  
**Step 4.** Show the model answer when required.

Class 6  
**Speaking – Session 4**

**Academic Listen-Speak**

Can you tell me about the different parts of our solar system?

What is the Sun, and what are planets?

Share some exciting details about the Moon and stars.

**Show Model Answer**

### Audio Script:

Hello, young astronomers! Today, we're going on an exciting adventure through space to discover the wonders of our solar system. It's like a cosmic story with different characters.

**Sun:** First, we have the Sun, our star. It's like a giant, shining ball of light in the sky. The Sun gives us warmth and light during the day.

**Planets:** Now, imagine that planets are going around the Sun. The Earth is one of these planets. Planets are like big, round rocks in space. They each have their own unique features.

**Moon:** Next is the Moon. It's like Earth's friend in Space. You can see it in the night sky, sometimes big and bright, and sometimes just a sliver.

**Stars:** Look up at night, and you'll see stars. They're like distant suns, twinkling in the darkness. Each star has its own story.

So, that's our Solar System! It's like a big family with the Sun, planets, Moon, and stars. Now, let's check what you've learned.

**Academic Listen-Speak**

Can you tell me about the different parts of our solar system?

What is the Sun, and what are planets?

Share some exciting details about the Moon and stars.

**Model Answer**

The teacher talked about our Solar System in four parts. First is the Sun, an enormous shining ball in the sky, which gives us warmth. Then, there are planets, like Earth, which are enormous rocks in space. The Moon is Earth's friend in space that we see it in the night sky, and stars are like distant suns that twinkle at night. It's like a big family of space objects. Each part has its own unique role in the cosmic story.
